

Thomas Longworth

Front-End Developer

Ontario, CA • (807) 356-6644 • thomaslong.studio@gmail.com • [LinkedIn](#)

I'm a creative front-end developer with a passion for crafting digital experiences. With 6 years of industry development experience and a solid background in UI/UX design, I bridge the gap between functionality and aesthetics.

WORK EXPERIENCE

Front-End Developer | Team Lead

August 2022 – Present

Theory Digital, Edmonton, AB

- Architected and developed custom Shopify themes and advanced features using Liquid templating, modern CSS, and JavaScript Web Components with accessibility and performance optimization top of mind
- Engineered scalable client websites and interactive features leveraging Next.js with Prismic Headless CMS integration
- Optimized and enhanced client web applications using Statamic CMS, implementing custom functionality and performance improvements
- Designed compelling user interfaces and interactive prototypes using Figma, translating client visions into pixel-perfect digital experiences
- Led cross-functional collaboration with clients and stakeholders, managing project timelines and delivering high-quality solutions on schedule
- Facilitated team stand-ups, managed task distribution and deadlines, and provided technical mentorship to junior developers

UI UX Developer

October 2021 - July 2022

Riva International, Edmonton, AB

- Built responsive and interactive front-end interfaces for enterprise applications using ASP.NET Core and Vue.js frameworks
- Produced comprehensive design systems, interactive prototypes, and detailed wireframes in Figma to drive feature development initiatives
- Conducted user research and stakeholder interviews to identify pain points and implement data-driven UX improvements

Front-End Developer & Designer

January, 2021 - October, 2021

Rent Panda, Thunder Bay, ON

- Developed and implemented custom front-end features and platform enhancements for the Rent Panda ecosystem using React.js
- Created user-centered design mockups, interactive prototypes, and comprehensive wireframes in Figma to guide feature development

Web Developer & Designer | Part Time

March, 2019 - August, 2022

Innovated Solutions, Thunder Bay, ON

- Designed, developed, and maintained custom WordPress websites for diverse client portfolios, ensuring optimal performance and user experience
- Produced engaging visual content including custom graphics, animations, and multimedia assets to support digital marketing campaigns
